DETAILED ACTION

Election/Restrictions

1. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, and 11-14 are drawn to detect the identification information of the user, classified in class 455, subclass 415.
 - II. Claims 8-10, and 15-16 are drawn to Bluetooth system, classified in class 455, subclass 41.2.
3. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the invention I is concerned with detecting the identification information of the user. The subcombination has separate utility such as the invention II in which it is concerned with a Bluetooth system.

Art Unit: 2618

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
